MINISTERIAL
Advancing Clean Energy Together

 **MISSION**
INNOVATION

 **G20**
BRASIL 2024

We are less than one month away from the 15th CEM Ministerial in Foz do Iguaçu, Brazil!

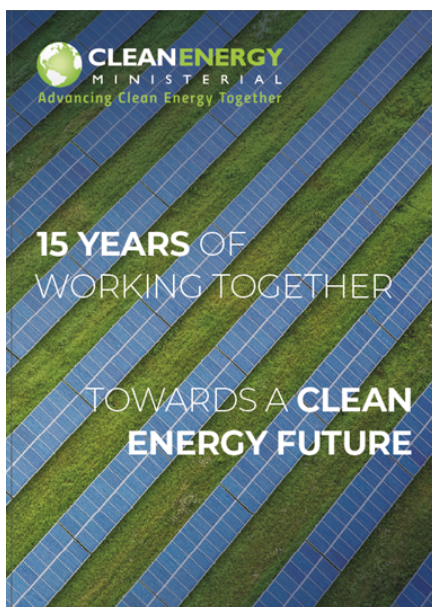

We are less than one month away from the 15th CEM Ministerial in Foz do Iguaçu, Brazil! We are excited to bring our members, partners and clean energy experts together to celebrate the CEM's 15th anniversary through a packed agenda including 50 side events and roundtables, as well as new announcements including the launch of new CEM initiatives. CEM15 discussions will centre around opportunities for collaboration to implement concrete actions needed to make clean energy affordable and accessible to all and accelerate the clean energy transition worldwide.

This year's Ministerial meeting will run in parallel to the 4th G20 Energy Transition Working Group (ETWG) meeting, with CEM Ministerial discussions happening just before the G20 Energy Transition Ministerial Meeting, allowing for deeper engagement and collaboration across the CEM and G20 communities. We are excited to see those of you attending in person and encourage the rest of our community to follow the action on our [LinkedIn](#) and [X](#) accounts.

Some expected outcomes include:

- **Recognition of CEM award winners:** The CEM Energy Management Leadership awards, Equality in Energy Transitions awards, Hydrogen TCP awards and the ISGAN Awards of Excellence will recognize their 2024 award winners.
- **A call to action on power systems solutions:** Power sector workstreams will come together to address key investment challenges such as flexibility, storage, electric vehicle infrastructure and regulatory frameworks through a formal call to action.
- **A Statement of Actions to accelerate low and zero emissions ‘future fuels’:** A coalition of CEM workstreams and partner organisations will work together to outline concrete actions to accelerate the use and production of low and zero emissions fuels.

CEM Highlights

CEM at 15 Years

To celebrate all we have accomplished in the past 15 years and to keep up the momentum for the years to come, we created a special anniversary flier. The flier showcases the unique value of the CEM, key achievements over the past 15 years and how the CEM will continue advancing its work to achieve net-zero.

#TBT to CEM1!

📅 14 years ago, the CEM held its first ministerial meeting in Washington DC in 2010.

24 energy ministers attended and 11 initiatives were launched, building on the Technology Action Plans released by the MEF and kickstarting the CEM's work as an implementation platform.

Partnerships have been at the centre of the CEM since the start and over 500 representatives from business, industry and non-governmental organisations participated in CEM1, making commitments to support the priorities identified by Ministers.

The CEM has grown to include 29 members and 23 active initiatives and campaigns in 2024!

As we gear up for CEM15 in Brazil, stay tuned for more CEM history and updates on the road to Foz!

HYBRID EVENT

5th International Forum on Long-Term Energy Scenarios

📅 9-11 September 2024

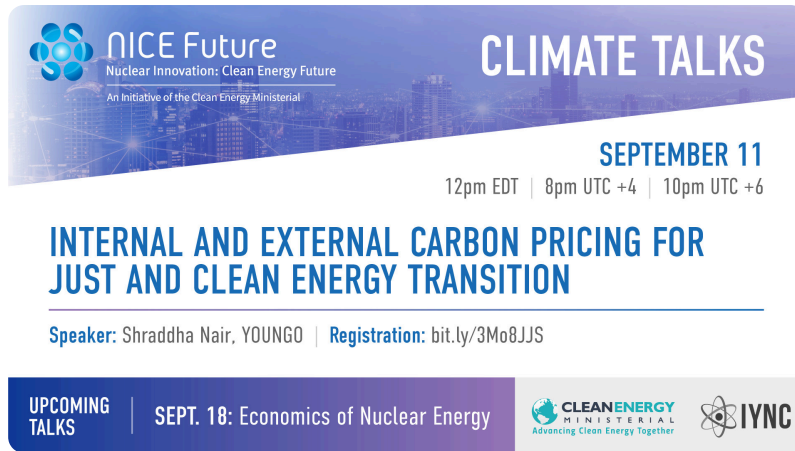

📍 Innovation and Technology Centre,
IRENA - Bonn, Germany & Online

Fifth International Forum on Long-Term Energy Scenarios (LTES) for the Clean Energy Transition

IRENA's 5th edition of this Forum will focus on alignment between energy and climate planning, the role of scenario planning for de-risking investment for the clean energy transition, scenario communication, lifestyle changes, energy security, and hydrogen integration. The Forum will take place in Bonn, Germany, from 9-11 September 2024 in a hybrid format (on-site and virtual). This event builds on the rich discussions held through the [Clean Energy Ministerial \(CEM\)](#), [LTES Initiative](#) and IRENA's Global LTES Network.

NICE Future Climate Talks: Internal and External Carbon Pricing for a Just and Clean Energy Transition

Join NICE Future and the International Youth Nuclear Congress for an insightful webinar on 11 September 2024, focused on "Internal and External Carbon Pricing for a Just and Clean Energy Transition." This webinar will explore carbon pricing as a critical tool in driving the shift towards sustainable energy. Presenters will discuss the challenges and feasibility of implementing carbon pricing, complemented by real-world case studies of successful implementations by companies and nations.

Online training course

Appliance Energy Efficiency Policy

The banner features a white refrigerator, a microwave, a washing machine, and a radiator against a green background with energy efficiency arrows.

SEAD Online training course on Appliance Energy Efficiency Policy

The IEA and the CEM SEAD Initiative developed a free access on-line training course on Appliance Energy Efficiency Policy. It presents fundamentals to design and implement an energy efficiency policy package by integrating regulations, information, and incentives to move appliances towards higher efficiency standards.

Coming soon

Consulting Opportunity

The CEM Empowering People Initiative (EPI) is looking for a new coordinator! EPI works to centre skills, workforce and inclusivity issues in the transition to clean energy. The initiative is looking for an individual coordinator with strong international project management experience in the green skills and education sector. Check the [CEM news page](#) for updates soon!

CEM 15th Anniversary Webpage

Stay tuned for the launch of our anniversary webpage next week! Go on a journey from the CEM's creation in 2010, to the upcoming CEM15 in Brazil with our interactive timeline.

CEM 15th Anniversary Video

A special anniversary video will also launch at the CEM15 in Brazil. It will be available on our website on 3 October.
